

This FCC Licensing request is to support the Crosshairs program. Crosshairs is a counter shooter system designed for employment on military tactical wheeled vehicles that uses both pulse Doppler radar and Continuous Wave Radar to provide hostile fire crew alert to incoming bullets, RPGs, ATGMs and Direct Fire Mortars aimed at the vehicle.

The Crosshairs effort is funded under multiple contracts – including:

Army Program contract #W911QX-05-D-0007

Army Program contract #W56HZV-09-D-0150

Army Program contract #W15P7T-10-D-A804
