---

Message:

The purpose for the license modification is as follows:

- A) To extend the duration of the experimental license to allow further Continental US Testing subsequent to initial feedback on the experimental system from Afghanistan
- B) To add sites to the experimental license that provide opportunities to test the system in areas or around features that were a source of potential false alarms.
- C) To support the company experimental testing of the latest model of the Crosshairs System in conjunction with prior models under new contracts from the government.
