Done my friend!

We grant you the right to use your device in our network. You are asked to supply the IMEIs you will test with, the dates and times of your tests. If you have any questions the only resource you may draw upon is myself....basically to field the requests. There are sad to say no available resources to draw upon at this moment...in a few months anything is possible.

Regards

Subject: Request for FCC

Hello Darren,

We are working on our next product(Quad Band-GSM/GPRS) and plan to have it ready for launch by the end of this year. We plan to have the PTCRB and FCC approvals by Oct / Nov'02 time frame. In the meanwhile, before we get the FCC Grant, we are in the process of applying for an FCC experimental license (FCC Model ID# KMP6J1F1) in order to test the EOTD functionality in your Washington, DC 1900 MHz network in the next few months working with CPS. FCC engineers called us a few days back and asked us to provide them with a consent from Voice Stream stating it was OK for us to perform the test there. Just a simple return e-mail response to this message would be acceptable to FCC.

I would appreciate if you could assist us in this matter.  
best regards,  
Sanjay Wadhwa
