To Whom It May Concern:

As SBE Frequency Coordinator for the Washington, DC area, we have been provided a copy of National Association of Broadcasters' (NAB) Request for Experimental Special Temporary Authorization (STA) proposing the testing of TV White Space devices.

We are not aware of any previously coordinated Broadcast Auxiliary Services (BAS) operations on the requested frequencies that will be impacted by the proposed tests. Should we become aware of any actual interference we will contact Mr. Robert Weller at the NAB immediately so that appropriate actions can be taken.

Regards,

Michael D. Rhodes, P.E.
