Subject: Additional Information Request

Message:

Request: in the NTIA Space Record, provide information about the receiver on the Globalstar side (Globalstar receiving from the TAGSAT-1), as well as the receiver on the TAGSAT-1 (receiving from the NSL Ground Station).

Response:

The NTIA Space Record has been expanded to continue to describe receiving by TAGSAT-1, as well as adding receiving on the Globalstar side. We have added section "Globalstar Satellite Receiver Data" in Part A.
