Subject: Additioinal Information Request

Message:

Please confirm (or correct) the below is an accurate description of the intended operations of the ThinSat-2 satellites:

Each ThinSat-2 satellite is a collection of individual ThinSat units (ranging from 1 to 7 units) connected together in series with the exception of ThinSat-2E, which is a box unit. The ThinSat-2 satellites are packed into two canisterized satellite dispensers on board the Cygnus resupply vehicle. Post-release from the launch vehicle, the multiple unit satellites will unfold and lock into an "open" position through the aid of memory metal hinges.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of December 08, 2020 may result in application dismissal pursuant to Section 5.67 and forfeiture of the filing fee pursuant to Section 1.1108.
