To Whom It May Concern:

This is to certify that:

NetNumber deploys and/or manages radio frequency equipment.

The RF experimentation will be conducted by following a strict Test Plan defined and approved by NetNumber in a controlled environment.

NetNumber will have a Project Manager in place to specifically follow the Test Plan, track results, and publish test results.

NetNumber has extensive RF experience and expertise deploying RF networks and have RF networking knowledge on staff.

For the above reasons, I believe NetNumber meets the Eligibility criteria for a Special Temporary Authority experimental license as set forth in the Commission Rules.

Sincerely,

Mark Noe
