Subject: Additional Information Request

Message:

- 1) Please provide a detailed description of your experiment. Antenna spec sheet is not a description.
- 2) Frequency band request of 698- 2700 MHz is quite a broad request. Please revise this and only request frequency band that you absolutely require for your test.
- 3) Please revise your geographic location. Your current application suggests that you're requesting mobile operation with radius of operation of 1 km from geographic location of 38 59 05 N and 076 19 10 W. You can request nationwide operation but chances of approval improve if you request specific location with specific radius of operation. You can add new antenna to your application with the geographic location of interest.
- 4) Please provide the required AFTRCC, FAA, AAG pre-coordination

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of July 25, 2019 may result in application dismissal pursuant to Section 5.67 and forfeiture of the filing fee pursuant to Section 1.1108.
