

Reason for License Modification for INCA Cubesat

The INCA cubesat is currently licensed under Experimental License 0807-EX-CN-2020. Since that license was issued, two changes to the mission have occurred, that make a modification to the license necessary.

1. The launch has changed, so the date coming into service has changed, along with the orbit parameters. The new launch date will be no earlier than December 15, 2021. The satellite will be inserted into a 500 km circular orbit, with an inclination of 41 degrees.
2. The LinkStar radio provided originally to communicate with the Globalstar constellation, has been removed.

This application, 0127-EX-CM-2021, updates the application and the exhibits to reflect these changes.
