Message:

I apologize, my earlier question probably seems overly broad.

If we restrict our frequency range to 2450-2480MHz, can we operate according to the +45dBW limit outlined in CFR 101.113?

Or if not allowed, can we restrict our frequency range to 2390-2450MHz and operate at the 1500W/62dBm limit outlined in CFR 97.313?

Or if not allowed, can we restrict our frequency range to 2360-2390MHz and operate at the 2000W per carrier limit from CDR 87.131?
