Question 7: Purpose of Experiment

A 850 MHz band authorization for both GSM and WCDMA experimental radio service is needed in order to support US TDMA operator's migration to GSM and then to 3G (AT&T Wireless, etc.)

These tests will include, but not be limited to, new software release testing, cell coverage enhancement testing, and integration testing with other vendor equipment. These test will enable Nokia to continue to make advances in the PCS field that will benefit Nokia, the service providers, and ultimately the public.
