Subject: Additional Information Request

Message:

RE: Response for the request for additional information regarding License Modification and addition of station, File Number 0015-EX-CM-2021, Correspondence Reference Number: 60448

Nokia Bell Labs will be deploying a Nokia Digital Automation Cloud (NDAC) solution at its Naperville, Illinois facility to operate a Private LTE/5G network that will be used to provide a platform for novel research projects. We searched the for incumbents in the area and found one which has a license pending since July 2020.

Since our network is only for Nokia campus wide use it has a small footprint, we will ensure the coverage footprint is limited to our campus edges and the antennas will be pointed in the northern direction away from the incumbent to the south.

If you have any questions or concern's, please let me know.

Yours Sincerely,
Glenn A Steitz
