

To: FCC

The form 442 “modification of experimental license” for call sign WH2XLL only modifies existing license by addition of two location/antenna. One in Basking Ridge, NJ (1 Verizon Way, Basking Ridge, NJ 07920) and one in Euless TX (1001 Bear Creek Parkway, Euless TX 76039). Both are Verizon sites.

Emission detail is identical. Previous attachments are identical and are hence not resubmitted. I would greatly appreciate if the modification can be approved and issued by the FCC OET in timely fashion. Thank you very much and I appreciate your attention to this modification of experimental license.

Best regards,
