Subject: Request for Info - File # 0881-EX-CN-2020

Message:

What we need is details on what you mean by frequency coordination. The FSS earth stations receive across the entire 3.7-4.2 GHz band and can experience interference from a significant distance, especially given the proposed power levels of the applicant's experimental deployments.

Are you getting coordination agreements from all earth station operators before deployment?

Are you working with a third party frequency coordinator?

Are you modeling possible interference and tailoring their deployments accordingly?

If so, what are the assumptions and processes you are using?

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of November 23, 2020 may result in application dismissal pursuant to Section 5.67 and forfeiture of the filing fee pursuant to Section 1.1108.
