Explanation of the letter "X" in all the emission (e.g., FXD or FXE)

Response: We have included designators using the letter "X" as these were granted to the manufacturer of the equipment proposed for this experimental application. Thus, they were provided for completeness. However, the NCGUG only plans to modulate the main carrier with quantized or digital information consisting of voice and/or data. Examples of proposed equipment associated with designators in this filing are shown below.
