RE: Amendment / Modification of File Number: 0499-EX-CN-2019

We found errors in the MO emission designators we submitted in the original application. These stations are not capable of F7. They are instead capable of F1. The following changes were made in the application:

7K60F7D	changed to	7K60F1D
7K60F7E	changed to	7K60F1E
7K60F7W	changed to	7K60F1W

This amendment is not directly related to Correspondence Reference Number 49294.
