

APPLICATION FOR ASSIGNMENT OF AUTHORIZATIONS

The requested application is amended to request an assignment of the licenses. This request is due to an internal corporate reorganization of Northrop Grumman Corporation. This assignment is *pro forma* because control over these licenses today is entirely with Northrop Grumman Corporation and after the assignment will continue to be entirely with Northrop Grumman Corporation. There is no ownership change of Northrop Grumman Corporation.

Northrop Grumman Space & Mission Systems Corporation, the assignor, is a wholly-owned subsidiary of Northrop Grumman Corporation. Northrop Grumman Systems Corporation, the assignee, also is a wholly-owned subsidiary of Northrop Grumman Corporation. The assignment are necessitated by Northrop Grumman Space and Mission Systems Corporation being merged into Northrop Grumman Systems Corporation as part of a general corporate restructuring. After the restructuring, Northrop Grumman Space & Mission Systems Corporation will cease to exist as a separate corporate entity.

The lead application in ULS for this transaction is file no. 0004076359. The application in ULS specifically related to Northrop Grumman Space and Mission Systems Corporation is file no. 0004076631. These replaced earlier applications. Consent was granted for these two applications on December 30, 2009.
