

Application for Experimental License

Northrop Grumman Systems Corporation (NGSC) requests modification of WI2XPX, File No. 0244-EX-CN-2016, for the purpose of increasing output power from 80 mW to 200 mW in the 869-894 MHz and 1930-1990 MHz frequency bands. The other two frequency bands already are authorized at 200 mW, and the higher power has been found necessary on all of the frequencies to conduct the needed experiments. There are no other requested changes.

This work is being conducted pursuant to USGOV contract number: H94003-04-D-0004 D/O 0327. POC is Mike Graham (NGB/A5RC), michael.graham.3@ang.af.mil (W) 240-612-7060.
