

Application to Modify Experimental License WH2XKP

This application by Northrop Grumman Systems Corporation (NGSC) is to modify experimental license WH2XKP, FCC File No. 0396-EX-CR-2019. The requested modification is to add 14.61 GHz as a mobile frequency, so that two channels – 14.61 GHz and 14.62 GHz – may be used airborne during experiments. **PLEASE NOTE:** If 14.61 GHz is not available, any other single frequency within the range 14.15-14.65 GHz may be substituted so long as there is a minimum of 10 megahertz spacing between it and the existing 14.62 GHz.

There is no change to the stop buzzers for this license.
