

## Application to Modify Experimental License

By this application, Northrop Grumman Systems Corporation (NGSC) requests to add Mojave, CA, as a second location to experimental license W12XKB. The purpose and all technical parameters remain the same, except from this location permission is sought to fly within a radius of 350 km of the stated geographic coordinates at a maximum altitude of 60,000 feet.

Pre-coordination by AFTRCC has been obtained is attached as a separate exhibit.

Please change the phone number for the stop buzzer for this license. The stop buzzer is Daniel Robinson, 661-480-8092; email: Daniel.Robinson2@ngc.com.
