Subject: EXT :RE: WL9XOK

Dan,

I will pre concur now. The FCC usually sends the request to USAF office who send to me. Those additional freqs you listed below are in the military LMR band. I don't see an issue at this time

Scott Connolley
Eastern Area Frequency Coordinator
Cape Canaveral Florida

Subject: [Non-DoD Source] WL9XOK

Mr. Connolley,

I am Spectrum Manager for Northrop Grumman, we have a program down in Florida that had the attached license up until this month. They would like to extend the license for another year to finish testing. I need to have approval from your office before I can submit to the FCC. Can I get a yes/no from you if the following frequencies are ok to test this year. 386.629, 390.495, 392.438, 394.400, 396.372, & 398.344 MHz.

Thank You,

Dan Robinson
