

Responses to Application Questions

Response to Form 442, Question 7: Description of Experiment. This application is to continue experiments of an E-band transceiver for potential use in RF backbone applications. The experiments will be a continuation of those initiated under experimental authority WH9XOD, 0473-EX-ST-2015.

Response to Antenna Registration, Question 4: Directional Antenna Information. The antenna is mounted on a van at no more than 3 meters above ground and will be aimed in various directions in both the horizontal plane and the vertical plane.
