Subject: Additional Information Request

---

Message:

Mike,

Please address the following questions and concerns.

- 1) Technical description is missing frequency bands.
- 2) In the Spacecap the Uplink minimum power density seems a bit low. Our estimate by emission code would put it around -12.5 instead of what the applicant lists as -36.5. Please verify.
- 3) No uplink frequency in form 442, however it is in the spacecap.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of July 07, 2020 may result in application dismissal pursuant to Section 5.67 and forfeiture of the filing fee pursuant to Section 1.1108.
