1. Licensee is authorized to use various modes of modulation, bandwidth, and data rates. None of these modes of transmission shall extend beyond the band band limits set forth above.

This special temporary authorization is granted upon the express condition that it may be terminated by the Commission at any time without advance notice or hearing if in its discretion the need for such action arises. Nothing contained herein shall be construed as a finding by the Commission that the authority herein granted is or will be in the public interest beyond the express terms hereof.

This special temporary authorization shall not vest in the grantee any right to operate the station nor any right in the use of the frequencies designated in the authorization beyond the term hereof, nor in any other manner than authorized herein. Neither the authorization nor the right granted hereunder shall be assigned or otherwise transferred in violation of the Communications Act of 1934. This authorization is subject to the right of use of control by the Government of the United States conferred by Section 706 of the Communications Act of 1934.

Re: Request for Extension and Modification of Special Temporary Authorization (File No. S-1223-EX-93,

Colorado Springs, CO)

KKZXCV

Dear Sir or Madam:

I am writing on behalf of Omnipoint Corporation ("Omnipoint") to request that the Commission (i) extend until July 31, 1994, Omnipoint's Special Temporary Authorization to operate spread spectrum wireless communications equipment in and around Colorado Springs, Colorado, and (ii) modify the STA to increase the maximum power to 100 watts EIRP.

On October 22, 1993, the Commission concluded that its PCS licensees should be permitted to operate at power levels up to 100 watts EIRP. Amendment to the Commission's Rules to Establish New Personal Communications Services, FCC 93-45, at 29 (adopting new Section 99.231) (released Oct. 22, 1993). Omnipoint requires the extension to continue testing its 1850-2200 MHz PCS equipment under the conditions prevailing in and around Colorado Springs at the original power levels and to extend its tests to the higher power levels contemplated by the Commission.
