

Antenna exhibit. We have an actual photo from another site. The location for which we are sending this application is not yet built. The antenna will be seated on the ground, not on any building. The antenna is 9 meters high and the ground is 3 meters above sea level. There is nothing tall nearby.

Also, please ignore an attachment I sent about question number 5 not being relevant (it's about foreign governments). I figured out that this attachment is what was wanted. Thanks.
