This email is your AFTRCC coordination.

This coordination includes this header information, DOD Area Frequency Coordinator comments and AFTRCC comments. These messages must not be separated.

This coordination is advisory only and not binding on the FCC. Applicants are advised that this coordination does not constitute a judgment that the frequency(ies) is best suited for the applicant's purpose nor that the frequency(ies) is exclusive to the applicant. Flight Test frequencies are shared and may require scheduling with other users.

In return for AFTRCC's processing of the applicant's coordination request, the applicant agrees to release and hold harmless AFTRCC, its officers, directors, agents, members, and representatives from any claims, losses or expenses that may arise from the use of the frequency.

This coordination is not an authorization to transmit. A copy of this coordination must accompany application to the FCC.

AFTRCC comments:

Intermittent usage is determined on availability of test aircraft.  
Testing does not occur on a regular basis and normally overnight to  
Minimize disruption to other potential users. Purpose of testing is to  
Identify any EMI issues due to use of PED's on commercial aircraft.  
Requestor is aware that granting coordination does not constitute  
exclusive use of the spectrum within the geographical area.  
AFTRCC database check confirms there are currently no conflicts within  
20 mile radius.

Additional comments:

The band 2345-2360.0 MHz has been reallocated on a primary basis to the  
Wireless Communication Service (WCS). Additional coordination with  
WCS may be required.

Please reply via return email as to concurrence, non concurrence, scheduling,  
or other comments.
