Subject: Additional Information Request

Message:

Dear Colleagues,

After further review by our technical team, the use of the letter "X" in our emission designator was an error. The correct emission designator for all of the modulating signals in the application is "G7W". I've amended the application to correct the emissions designators to "G7W".

I've also attached the AFTRCC pre coordination document. Please note, the application frequency requested has been amended to 2370 - 2380 Mhz.
