Subject: Additional Information Request

Message:

Your narrative states that you shall be utilizing a new and different sweep rate in order to obtain data and advance your understanding of the full potential of the technology. If you make changes to any FCC approved device, then that device is no longer under part 15 authorization. This is an Ultra-WideBand application and I have to coordinate this with NTIA.

Please provide the precoordination information for the request in AAG Bands, MAG Bands, and AFTRCC frequencies.

Generally only applications with DOD contract number are approved in the MAG Band.
MAG Band: 225.000-328.600 MHz and 335.400-399.900 MHz frequency bands

Please visit the links below for AAG Bands

<https://www.ntia.doc.gov/page/frequency-assignment-subcommittee-fas>

In addition to the above link, FAA precoordination is also required for 2700-2900 MHz and 9000-9200 MHz frequency band.

For AFTRCC: 1435-1525 MHz, 2345-2390 MHz, and 5091-5150 MHz

Please visit the following link

<https://www.afrcc.org/>

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of July 11, 2019 may result in application dismissal pursuant to Section 5.67 and forfeiture of the filing fee pursuant to Section 1.1108.
