Subject: Additional Information Request

Message:

Please address the following questions/concerns.

1) Spacecap:

The applicant included both an ARCE filing (for CR) and the ARCE-1 (for API) in the spacecap. The information in the CR section is incomplete, and contains only basic station orbit data (which appears to be inaccurate). As they have the IARU letter. The CR tab is incomplete. Please clarify

They have marked both the Tx's with 4.4 but not the Rx's. It appears the applicant will be using (ISM) applications for both directions. Please clarify.

2) ODAR:

The ODAR is marked as subject to export control laws, but it has been uploaded to the public portion of ELS. So it should probably get removed at least temporarily.

It may be possible to remove the export control marking and resubmit—we didn't see anything from our review that seemed an obvious export control concern--but the applicant will need to assess this.

We will need something for the public portion of ELS regardless, so if there is a valid export control concern the applicant will need to look at redacting or revising the ODAR.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of November 14, 2019 may result in application dismissal pursuant to Section 5.67 and forfeiture of the filing fee pursuant to Section 1.1108.
