Subject: Request for Info - File # 2010-EX-ST-2019

Message:

1) Your FAA pre-coordination document is lacking the geographical information for the approved frequencies. That information is required, and it has to match the geographical request in your application.

Will be addressed by FAA:
Lorena Carvajal
Federal Aviation Administration
Spectrum Engineering Office AJW-1C2
202-267-7051

2) According to the pre coordination document, for M118.1500, Transmitter Radius is 30 km. In the STA request for M118.15 you have entered 55.56km. Please address this.

This has been updated in the application. Initially it was thought that the radius of operations was given by the FAA in nautical miles so it was converted. The file now reads 30 KM to align the FAA/FCC operations parameters.

3)Where is the transmitter radius information in the FAA pre coordination document for the rest of the frequencies?

Will be addressed by FAA:
Lorena Carvajal
Federal Aviation Administration
Spectrum Engineering Office AJW-1C2
202-267-7051
