Subject: Additional Information Request

Message:

Dear Nimesh,

Let's then proceed with the "Program Experimental License" to conduct experiments in the 27.5 - 28.35 GHz band at the building I have specified in the GIS map. In case in the future we would like to conduct experiments in other locations or frequency bands, we will amend our license to include those locations and frequencies.

We will follow your guidelines and announce each experiment at least 14 days prior to experiment by registering in the Experiment Notification website.

Many thanks,
Ehsan
