## **Application Narrative for Proposed Special Equipment Program**

### **Proposed Program**

The mission of Product Support Services, Inc. (PSSI) is to provide professional repair, maintenance and consultation services to the consumer electronics industry and manufacturers of consumer electronics devices.

Our vision is to assist the manufacturers of communications devices to better design, implement and support GPS technology enabled devices throughout the marketplace.

### **Objectives**

We seek to accomplish the following objectives:

1. Illumination of our service area with re-radiated GPS signals.
2. Further the design, development and enhancement of existing GPS products and the possibility of evaluating new products.
3. Support, repair and/or design GPS products and equipment utilizing GPS technologies.

### **Contribution to Radio Art**

Research is currently under way at PSSI to develop, design and implement new ways to utilize GPS-derived information in an improved and productive fashion that is consumer friendly. The ability of repairing, supporting and understanding devices that utilize GPS technology allows PSSI the unique perspective of evaluating new and creative solutions to a variety of issues.
