

EXPEDITED ATTENTION REQUEST

Puloli, Inc., respectfully requests expedited attention of the instant Application for Special Temporary Authority (“STA”). As discussed in the application, Puloli is in the process of obtaining equipment certification, but must first test the equipment under real-life conditions in order to determine the requisite power levels.

Puloli will be operating on the spectrum assigned to Station WPRR302 as the result of a spectrum manager lease agreement with BPC Spectrum, Inc., which was approved by the Federal Communications Commission (“FCC”) on February 5, 2019 (Lease Id. L000033284).

Puloli’s operations under its spectrum manager lease with BPC Spectrum will be used in connection with Station WPRR302’s substantial service and renewal showings to the FCC, which must be submitted by June 13, 2019. Puloli is working to complete the equipment certification process necessary to those operations, and requires the instant STA to field test its equipment as the equipment certification process is being completed.

Expedited attention and approval of the instant request will permit Puloli to (i) conduct equipment tests, (ii) complete the certification process, and (iii) commence service prior to June 13, 2019. Therefore, the public interest is served by the requested expedited attention to this application.
