

FCC, Mr. Kennedy,

1. You requested Raytheon SAS, to described this experiment in greater detail (1. is the transmitter a radar (No) the CDL equipment is an RF data link. It is used to move data from the airborne platform (RMT) to a ground station and vice versa.

2. Justify the need for a CONUS authorization, we have specific requirements on some of our programs that require us to use the CDL equipment. Therefore, we

are requesting authorization to use the CDL equipment for the development flights to support and meet that requirement.
