To Operate in the 2200 -2290MHz Telemetry  
Band to Provide Television Coverage in Buffalo, New York.

ATTN.: Microwave Branch

RF Film, Inc. hereby requests Special Temporary Authority (STA) to operate in the 2200-2290MHz telemetry band pursuant to Section 21.25 of the Commission's Rules. RF Film, Inc. requests that the Commission grant it temporary authority to operate on the frequencies centered on 2255MHz with an 8MHz bandwidth and 2276MHz with a 16MHz bandwidth from April 30, 2015 with intermittent usage and ceasing operation on May 30, 2015. As explained below, RF Film, Inc. is filing an STA request for the shooting of a Paramount Pictures feature film currently titled "Half Shell" shooting in Buffalo, New York. RF Film, Inc. submits that there are extraordinary circumstances warranting a grant of the STA request.

Paramount Pictures - Half Shell has contracted RF Film, Inc. to provide the necessary microwave for the filming of this movie. Due to the extreme frequency congestion in the Buffalo area, coupled with the added congestion from traditional Television and News coverage of special events, RF Film requests the use of channels in the 2200 - 2290 MHz Telemetry Band.

RF Film, Inc. certifies that the operation of the requested channel for the purposes specified herein will not cause interference to any established stations.

Grant of the instant request for STA in the 2.2GHz band would serve the public interest by enabling RF Film, Inc to supply the requested remote video coverage for this event. The proposed service would enhance filming of the event by providing on the spot pictures from mobile locations that would not otherwise be available to the production company.

In accordance with Section 74.633 of the Commission's Rules, the following is provided:
