To Operate in the 2200 -2290MHz and 2360-2390MHz Telemetry Bands to Provide Video Coverage in Las Vegas, Nevada.

ATTN.: Microwave Branch

RF Film, Inc hereby requests Special Temporary Authority (STA) to operate in the 2200-2290MHz and the 2360-2390Mhz telemetry band pursuant to Section 21.25 of the Commission's Rules. RF Film, Inc. requests that the Commission grant it temporary authority to operate on the frequencies centered at 2368MHz and 2382MHZ with an 16 MHz bandwidth and 2200-2290MHz with a 10Mhz bandwidth from October 26, 2012 with intermittent usage and ceasing operation on November 16, 2012. As explained below, RF Film, Inc is filing an STA request for the shooting of a feature film currently titled "H3" in Las Vegas, Nevada. RF Film submits that there are extraordinary circumstances warranting a grant of the STA request.

Warner Brothers Pictures has contracted RF Film, Inc to provide the necessary microwave for the filming of this movie. Due to the extreme frequency congestion in the Las Vegas area, coupled with the added congestion from traditional Television and News coverage of the special event, RF Film requests the use of channels in the 2200-2290 MHz and the 2360 - 2390 MHz Telemetry Bands.

RF Film, Inc certifies that the operation of the requested channel for the purposes specified herein will not cause interference to any established stations.

Grant of the instant request for STA in the 2.2GHz and the 2.3GHz bands would serve the public interest by enabling RF Film, Inc to supply the requested remote video coverage for this event. The proposed service would enhance recording of the event by providing on the spot pictures from mobile locations that would not otherwise be available to the production company. RF Film, Inc is in the process of obtaining the consent of the relevant frequency coordinators for this project.

In accordance with Section 74.633 of the Commission's Rules, the following is provided:
