Subject: 0073-EX-PL-2005

Carl;

In reference to file # 0073-EX-PL-2005, I would like to add 2 Items to the filing:

1. The purpose of the Experimental license is to demonstrate our system at the 2005 CTIA trade show in New Orleans from March 12th until March 18th. Since these dates are coming very close, I would appreciate it if you could expedite this license.
2. The frequencies that are requested are the European DCS 1800 band. We intend to demonstrate this product to overseas customers that will be attending this show.

If there is anything else you need, please contact me as soon as possible.
