---

Message:

Raytheon BBN Technologies is supporting the DARPA program Advanced Wireless Network for the Soldier (AWNS), using the Wireless Network after Next (WNaN) radio which is to test a hand held radio that could be deployed to individual soldiers. In order to prove network scaling that is suitable for individual soldiers. Cadets at the United States Military Academy (USMA) at West Point, NY will have 48 WNaN radios and will be using them during their training to test the capabilities of the WNaN radio. The initial testing will be in June 2014.
