Subject: E/S REGISTERED: [SUN+05G2] FOR R-AST - ORBLOC: 237

Dear Sir or Madam,

Thank you for your message.

We have registered your earth station with the standard indicated below based on the submitted antenna performance. The antenna code assigned to your earth station is as follow:

<u>ANTENNA CODE</u>	<u>ANTENNA NAME</u>	<u>OWNER/OPERATOR</u>	<u>SIZE</u>
SUN+05G2	R-AST	INTELSAT GENERAL CORPORATION/RAYTHEON	1.80

The required test now includes Cross-Pol Isolation measurements only and will be performed during the SSOG line up process. Upon receipt of the SSOG message with detailed carrier line-up instructions, please contact Intelsat's CMC at 1-404-381-2600, email: CMCOPS@Intelsat.com before activating new services in order to perform the Cross-Pol Isolation measurements.

The CMC provides 24x7 real time technical assistance and will help perform the Cross-Pol isolation test. If the performance of the antenna falls outside the expected criteria of the standard, you will receive a notification detailing the change in standard and/or the possible delay to service.

Please contact your Intelsat Representative that handles your area for SSOG Line-up message.
