Message:

Ben,

Could we change the frequency band to read 4400 - 4940 MHz, I checked the NTIA Red book and see no footnotes related to this band that says we cannot request the whole band. On the previous STA I request 4400 - 5000 MHz but was told to remove 4940 - 4990 MHz which I concurred. The approved STA we received the frequency band requested was spilt to 4400 - 4420 MHz and 4430 - 4940 MHz. Please let me know if theres a problem requesting the frequency band of 4400 - 4940 MHz.
