

Purpose: RFA NEW LN EXHIBIT 1

APPLICANT : Capital Beltway Express, LLC

January 21, 2014

FRN: 0015362981

The Capital Beltway Express, LLC (Applicant) is seeking Commission approval to Use Location Narrowband (LN) frequencies in the 902-928 MHz band to support Highway tolling activities in Prince William and Fairfax County, VA. Applicant will employ the

Automatic Vehicle Identification, Intelligent Transportation System, which includes the Tran score RF Module, Model IT2611. FCC ID for Model IT2611 is FIH2611SS (See Exhibit 2).

This system uses two technologies to identify and collect revenue from driving public. Camera systems capture images of license plates and system of tag readers capture the Automatic Toll Collection Identification (AVI). One of the many significant benefits with automation is dramatic reduction of pollutants directly attributed to the elimination of stop-and-pay toll methods.
