Subject: FCC file number 0525-EX-PL-2008

Message:

Please provide the description of the operation to be conducted and its purpose in more details.

This marine navigation radar is similar to the radar found on LPD ships, but the radar raw data is useful for more general radar processing activities. Raytheon will utilize the radar output to test ship navigation processing software, network distribution of radar data, and processing of radar data in navigation consoles.

Please provide the name and phone number of the point of contact person from U.S. Navy
