AFTRCC comments: please note that AFTRCC no longer coordinates the frequencies 2310-20 or 2345-60 MHz on a secondary basis due to the current, nationwide rollout of LTE by ATT (WCS primary).

This is a requested renewal with no issues reported previously.

Requestor states that frequencies are for ground check out within (indoors) productions facilities, mostly hooded. Requested ERP of 40 watts rarely utilized, most testing at 5 watts ERP.

Please reply via return email as to concurrence, non concurrence, scheduling, or additional remarks.
