I'm confirming on behalf of Sirius XM that it has requested, and Raytheon has agreed, to a notch-out of the 2315-2350 MHz frequencies for the Gulf of Mexico/Santa Rosa Island, FL location requested in the above-referenced experimental application. Sirius XM does not object to Raytheon's proposed use of the SDARS frequencies or adjacent spectrum with respect to the other locations requested by Raytheon in Arizona and California.

Please let me know if you need anything else.

Best regards,
Karis

Hi Ben,

My program has agreed to carve out the Sirius/XM frequencies from their proposed operations in the Gulf of Mexico area.

I am copying Ms. Hastings on this message as well, to let her know that we agreed to the Sirius/XM condition.

If she sends me a confirming email, I will upload it to the FCC system.

I can modify the application, if that would make everyone happier.
