Subject: RE: coordination of 1179-EX-ST-2018

Anne,

Thanks for your note. I've shared the information regarding this experimental request with Sirius XM, and the company has no objections to the proposed operations.

Please let me know if you need anything else.

Best regards,
Karis

Subject: coordination of 1179-EX-ST-2018
Importance: High

Hi Karis,

Raytheon has a pending application for operations in the California desert (near, but not too near 29 Palms). The proposed operations are for testing of the UAS system that operates using radios in the 2312-2507 MHz band. We have coordinated operations with you on this in the past, for use in Florence, AZ. The operations are similar, just a new location. A copy of the exhibit we filed and a copy of the FCC exhibit are attached for your review purposes.

The FCC has asked us to coordinate the proposed operations with Sirius/XM. You may have seen this application and decided the location did not concern you, but if you have not seen it, please let me know if you have any questions or if there is anything else you might need to give your ok to the proposed operations.

Thank you very much,

Anne Cortez, Esq.
