Subject: FCC File No. 0271-EX-ST-2007

---

Message:

Mr. Ghaffari, this is in response to the following email comments from your office for FCC File No. 0271-EX-ST-2007:

Mr. Kavalal, Please submit interference analysis to support the fact that your requested frequency band (6000-7000 MHz) at ERP 25.6 kW does not cause harmful interferences to the Fixed Microwave and Auxiliary Broadcast licensees within 10 Kilometers of the requested location (NL39-47-40, WL86-02-06).

Our Response: We at Raytheon do not have information regarding any Broadcast licensees at 6-7 GHz within 10 kilometers of our location. If you could provide such information we could work the analysis - unless you have such analysis tools at your disposal.

Please advise.
