Subject: FCC File No. 1718-EX-ST-2021

Message:

- 1) The total number of fixed devices is 56 cooperating base stations at each location. The total number of mobile devices is approximately 400 Band 42 and Band 48 LTE phones at each location.
- 2) The only contractual arrangement is with SAP Center to use their facility for wireless experiments when it does not interfere with its normal operations (e.g., on days when the arena is empty).
- 3) Rearden LLC has not and will not charge any fees. Rearden is only conducting wireless experiments under this STA.

Thank you
Cindy
