Subject: File Num#0433-EX-CN-2019 reminder on FAA pre-coordination data request

---

Message:

FAA Coordination should not be required for this Experimental Authorization. This application was filed at the suggestion of Commission staff because it is in effect a continuation of testing of an RF device authorized by two granted STAs (See, WN9XUD and WN9XUE (File numbers 2050-EX-ST-2018 and 2061-EX-ST-2018 respectively).

However, if this application does for some reason require FAA coordination, communications counsel for the applicant has registered with FAA and will apply for coordination.
