

Response to FCC Correspondence (FCC File # 0003-EX-ML-2007 and Reference #: 4950)

Please specifically report the INMARSAT satellite(s) that is/are being used in your experiment.

Rockwell Collins intends to use the three Inmarsat geostationary satellites that are visible from the United States and support aeronautical services. These satellites are:

Inmarsat satellite I-4 F2, designated ocean region = AOR-W, longitude = 54W

Inmarsat satellite I-3 F2, designated ocean region = AOR-E, longitude = 15.5W

Inmarsat satellite I-3 F3, designated ocean region = POR, longitude = 178E

In addition, Rockwell Collins intends to use Inmarsat satellites (which also support aeronautical services) that are repositioned in the future that are visible from the United States.
