Dear Holly:

Your request for renewal of WD2XJA should not be a problem in the area of your request. There are no active TV stations on the air for the frequencies you are using. It should be noted that there are some other radio users in the 752-794 MHz area not related to broadcast. Specifically 746.0 – 746.5 & 776.0 -776.5 have active two way radio. There may be other new licenses that I am not aware of.

I have not heard of any issues with WD2XJA experimental in the DFW area.

Johnny Stigler

**Importance:** High

Dear Mr. Johnny Stigler / Society of Broadcast Engineers, Inc.:

Rockwell Collins is renewing an experimental license WD2XJA with the FCC.

The FCC has requested that we contact you for prior-coordination and to obtain a consent letter, from your organization, (email is acceptable), for our use of frequency bands: 476-482 MHz, 488-494 MHz, and 752-794 MHz. The location of frequency use will be at latitude and longitude: N32-59-45.0/W96-39-48.0 (Richardson, TX) and mobile (within 10 km), centered around N32-59-45.0/W96-39-48.0.

The FCC will not proceed without SBE's consent. Any assistance you can provide would be greatly appreciated.

I was going to complete this request using SBE's on-line program, but we are not an "event", so I wasn't sure how to proceed. I found your name as the contact for Dallas, TX on the SBE website, but have also included the coordinator locator email just in case you are not the contact.

Should you have any questions or comments, please contact myself at the number below or my manager,

John Giff at 703-516-8200.

Thank you for your time.

Regards,  
Holly Riesz
